la ricerca scientifica

La chimica apre un orizzonte sconfinato alla creazione umana. Ogni qualvolta le fonti di approvvigionamento delle materie prime naturali fecero difetto, la chimica scoprì le necessarie sostituzioni, ripetendo in un tempo infinitamente più breve processi naturali che nel sottosuolo si svolgono con lentezza millenaria. La Montecatini si è posta anche in questo campo tra le maggiori industrie chimiche mondiali, dando vita a
