Calculation of weighted average

In order to calculate the weighted average we must multiply each mark by the number of credits the exam is worth; the sum of these outcomes is then divided by the total number of credits taken into consideration.

Example:

exam 1	mark 26/30	worth: 9 credits
exam 2	mark 30/30	worth: 12 credits
exam 3	mark 18/30	worth: 9 credits
exam 4	mark: approved	worth: 3 credits
total credits possessed		33 credits
total credits considered for weighted average		30 credits

Calculation of weighted average:

26 x 9 =	234 +	
30 x 12 =	360 +	
18 x 9 =	162 +	
total	756	weighted average: 756 / 30 = 25.20

Interested students who are regularly enrolled in courses for the academic year 2019/2020 must submit their applications by completing the online form available on the website www.iulm.it, in the section “Agevolazioni economiche – Borse di studio d’Ateneo” (Financial benefits and scholarships – Scholarships from the University), under **SPORTELLLO TASSE - DSU** no later than
