

Guidelines for activating a research period abroad

Doctoral students can carry out research and/or training stays at universities, research institutes, research centers and/or laboratories abroad for a stay not exceeding half of the entire doctoral program duration (18 months). The amount of the scholarship is increased, for any periods of stay abroad longer than 21 days each, by 50%.

PhD students who wish to carry out a period of research abroad must send dottorati@iulm.it and risorse.umane@iulm.it, at least two months before the planned date of departure:

- 1)** Introduction letter from their mentor to the foreign host institution
- 2)** Acceptance letter received from the foreign host institution

The acceptance letter must specify the exact dates of the period abroad, a brief description of the activities that will be carried out and specify whether the Phd student will carry out training activities, research activities or both.

The doctoral student must simultaneously contact the Human Resources Office for administrative aspects related to the increase of the scholarship.
